

## BridgeTab (BT) WiFi icon BEFORE start of game

Icon	Button	Description	Text in app
	n/a	BT's WiFi setting is off Set it to the same nw as used by PC	Wifi off
	n/a	WiFi is on but no nw selected. Set it to the same nw as used by PC	No Wifi connected
	n/a	BT is connected to another WiFi nw than the one previously used. Check that the nw is = nw used by PC and, if it is, select NEW GAME in the TD menu.	WiFi changed
	n/a	No broadcast received last 10 minutes. Poor signal: Bring BT closer to the base Good signal: Check that BTC uses the same nw as the BT and that the IP shown by BT and BTC is the same.	Server n/a TD: Check that BTC runs
		TD has not yet started the game in BTC, but players may pre-register their IDs.	Registration possible!
		IP is hard-coded. This alternative should be avoided if at all possible by selecting the Auto alternative in the TD menu / BT CONTROL'S IP.	Connected to IP no....
		Less than one minute since the last connection with BTC. First retry then, if problem persists, see the orange/yellow icon for further remedies.	Game started
		More than a minute but less than ten minutes since the previous communication with BTC. First retry then, if problem persists, see the orange/yellow icon for further remedies.	Game started
